

Tork Advanced Wiper 415 Centerfeed Roll

article: 100134

système: M2 - Centerfeed system big

Epaisseurs: 1

Couleur: Blanc

Impression: Non

Gaufrage:

Laize: 24.5 cm

Longueur du rouleau: 275 m

Diamètre du rouleau: 19 cm

caractéristiques des produits

Forte capacité d'absorption

Rouleau d'essuie-tout à dévidage central

Chiffon multi-usages pour divers lieux de travail

Bonne résistance à l'humidité

Livré dans un Carry-box très pratique

données d'expédition

unité de vente:

EAN: 7322540069181

pièces: 1

hauteur: 245 mm

largeur: 190 mm

longueur: 190 mm

volume: 8.8 dm³

poids net: 1583 g

poids brut: 1583 g

unité de transport:

EAN: 7310791043036

pièces: 6

unités de vente: 6

matériel: Carton

hauteur: 262 mm

largeur: 396 mm

longueur: 586 mm

volume: 60.8 dm³

poids net: 9.50 kg

poids brut: 10.04 kg

Content

Virgin pulp, Recycled fibres, Chemicals

Material

Virgin fibres and recovered paper

In the tissue process both virgin fibres and recovered paper are being used. In the process it is a matter of finding an efficient solution where both virgin fibres and recovered paper play a role.

Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important. The environmental benefits and

economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material. Bleaching of fibres

Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet

the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) (where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view. The used functional chemicals are: Wet strength agent, Dry strength agent, If coloured = Dye Fixing agents, If white Fluorescent whitening agent, If needed Glue Softeners. The process chemicals are: Antipitch Protection agent, Yankee coating Defoamer, Dispersing agents and surfactants, pH and charge control, Retention aids, Broke treatment chemicals, Drainage aid.

Product safety

The product fulfils the legislative requirements for food safety = Isega.

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes. Environmental label = Ecolabel. This product is approved for Swan label, licence 305 003.

Date of issue 2007-08-28

Revision date 2009-11-02

Production

This product is produced in Lilla Edet mill, Sweden, certified according to ISO 9001, ISO 14001.

Destruction

This product is mainly used for personal hygiene and can be collected together with household waste. If used for industrial processes check local regulations for destruction.
